MTI - Delivery Checklist - For Programmer - Sign Point by Point

Version 4.0 - 2026-11-06 - Owner: MTI - Farag Ali - Source of truth: MTI_Core_Partners_System_v4_Final.json - Programmer must tick each point, then sign at the end. No real build starts before all points are ticked.

A. ENTRY - CODE DECIDES PATH

No.	Checklist point - Programmer must confirm	Done	Note
1	Personal Assistant is the single entry point for every person.	[ ]	
2	Code entry works. Empty code opens guest path only. Wrong code opens nothing.	[ ]	
3	One session = one code + one path. Changing role needs a new session with the other code.	[ ]	
4	Revoked code fails login with: code revoked - no entry.	[ ]	
5	Every code use is logged: code, time, identity, path opened.	[ ]	

B. IDENTITY CARD + PASSWORD

No.	Checklist point - Programmer must confirm	Done	Note
1	After code entry, Identity Card shows: full name, company / institution, official entity (Customs / Taxes / Bank / FRA / other), role, code, path, member since, status.	[ ]	
2	Password is created by the person, exactly 8 chars, medium: letter + number + symbol.	[ ]	
3	First-time: create + confirm + live checklist + strength meter, then password stored for that code.	[ ]	
4	Returning: enter password + show/hide eye. After 3 wrong tries, session locked, must enter code again.	[ ]	
5	Forgot password resets via owner code MTI-OWNER-001 only.	[ ]	
6	Account settings: update company + official entity + phone + email, change password, deactivate account.	[ ]	

C. FIRST-TIME GUEST - B2B / B2C / C2C + MEMBERSHIP

No.	Checklist point - Programmer must confirm	Done	Note
1	Guest landing is graphic: banner + promo cards (Ceramic, Tomato Paste, T-Shirt).	[ ]	
2	Three choices work: B2B company to company, B2C company to customer, C2C person to person.	[ ]	
3	Each choice shows its own path and its own needed documents checklist.	[ ]	
4	Membership flow: data form, documents checklist, core issues MTI-DEAL-2026-00X, membership card, create password, membership approved.	[ ]	
5	Entry with new code jumps back to login with the new code prefilled.	[ ]	

D. WORK HUB + NOTIFICATIONS + FILES

No.	Checklist point - Programmer must confirm	Done	Note
1	After correct password, Work Hub shows 7 cards: View, Update my data, New deal, Follow my works, My accounts, My documents, Notifications.	[ ]	
2	Notifications: sender Personal Assistant, bell + unread count, filter All / Unread / Read, mark all as read.	[ ]	
3	Auto notifications on: task approval, code issue / revoke, deal close, file decision.	[ ]	
4	Manual notification: owner selects recipient code, writes text, sends, it appears unread for recipient.	[ ]	
5	Legal files, Accounting files, Client files, Audit files each open in viewer with full text + approve / reject / confirm / note.	[ ]	
6	File decisions update task status and are recorded in log and core.	[ ]	

E. PARTNERS + COMMISSION BASE - READ CAREFULLY

No.	Checklist point - Programmer must confirm	Done	Note
1	Legal path shows legal tasks only. Accounting path shows accounting tasks only. Audit path shows audit tasks only.	[ ]	

2	Accounting code MTI-ACCT-001 and audit code MTI-AUDIT-001 are separate, even for the same office. Audit session cannot post daily entries.	[ ]	
3	Joint tasks need both approvals before execution.	[ ]	
4	Commission: Each partner = 3% x total_deal_commissions_collected. Core total = 6%. MTI retained = 94% before operating costs.	[ ]	
5	Base = total MTI deal commissions actually collected from deal contracts only, before any deduction.	[ ]	
6	Excluded from base: subscriptions, total income, net profit, any income that is not a deal commission.	[ ]	
7	Example check: 20,000 + subscriptions 2,000 NOT included = partner 600, not 660.	[ ]	
8	No partner is paid before actual collection.	[ ]	
9	Bank reconciliation runs daily and monthly. Every task has a written, stamped record.	[ ]	

F. DASHBOARD + LOG + DATA + FINAL

No.	Checklist point - Programmer must confirm	Done	Note
1	Owner dashboard: summary cards, all paths table, alerts with jump to path, recent activity.	[ ]	
2	Code management: owner only, issue new code MTI--00X, revoke code, table with status.	[ ]	
3	Reports: monthly table 6 months + yearly summary + bar chart + CSV preview with copy.	[ ]	
4	Full log: every action - entry, password, file, task, code, notification, deal, update - with time, identity, code, action, path, result + filters + search + CSV preview.	[ ]	
5	Data model built: session, code, identity, membership, task, partner_opinion, commission_record, ledger_entry, notification, activity_log.	[ ]	
6	Each identity sees only what belongs to that identity. Data is never sold. Data is used as paid services only.	[ ]	
7	App preview sample data replaced by real core data in final build.	[ ]	

SIGNATURES - Real build starts only after all boxes are ticked.
